## **INCJ and NEDO signed a mutual cooperation agreement to create new industries**

**Tokyo, February 20, 2015**—Innovation Network Corporation of Japan (“INCJ”) and New Energy and Industrial Technology Development Organization (“NEDO”) announced today we have signed a mutual cooperation agreement with the aim creating new industries. INCJ and NEDO seek to create new industries through cooperation in the following areas:

1. Commercialization of the outcome of technology development

NEDO furnishes information regarding the details of R&D projects supported by NEDO to achieve commercialization. INCJ provides information and advice regarding technology needs based on international market trends, as well as on the perceived challenges of technology commercialization. Both NEDO and INCJ aim to implement and achieve specific business projects.

2. Promotion of industrial technology

NEDO and INCJ will work cooperatively to create new industries through the promotion of industrial technology with sharing both knowledge and expertise in industrial and technological trends.

3. Establishment of review committee

To promote items 1 and 2 above, INCJ and NEDO will establish a review committee composed of executives from both organizations.
