

**Target:** Care Design Institute Inc.

**Business Outline:** Create and provide AI-based elderly care plans

**Authorized Investment:** 800 million yen (maximum)

## Care Design Institute Inc.

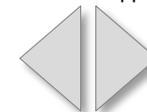

**Establish a new company that fuses elderly care and AI to create a new, independence-based care platform**

- Through the application of AI, create care plans appropriate to the physical condition and ailment of the individual requiring nursing care. Implement care management in a way that supports self-reliance.
- This business was spun off from Saint-Care HD, which has conducted empirical research on nursing care in collaboration with major local authorities.
- The AI program learns the care plans of previous care service users and creates a plan that promotes self-reliance.
- Business alliance with Silicon Valley-based company Activity Recognition.

- New business spin off
- Investment, business collaboration
- Sharing of experience and expertise
- Introduction of independence-support care model

- Investment, capital alliance
- Business support

Other operators in care-services sector.

- Addresses social issues of escalating social security costs and care-worker shortage
- Creates open innovation encompassing entire sector, including care service providers and social services corporations
- Represents a paradigm shift to independence support provided by a neutral, independent new company
