## **ENAX**

Target: ENAX, INC.

Outline: Cutting-edge venture company focused on laminated lithium ion (Li-ion) battery technology. Laminated batteries,

unlike the cylindrical batteries commonly used for consumer applications, use superior technology characterized by

a combination of safety; charge and discharge capabilities; and large capacity

**Authorized investment**: ¥4.5 billion (maximum)

## Investment

**Managerial support** 

Investment

Investments from other investors and existing business alliance partners

Pioneer in laminated Li-ion batteries

- Achieve large scale to target industrial applications growth market
- Promote niche applications globally
- Collaborate with related businesses in Japan and overseas

Major trading companies, Major electronics components makers, etc.

Domestic and overseas battery materials manufacturers and other chemicals companies

Industrial machinery manufacturers, auto makers and other battery users

Contribute to strengthening the competitiveness of Japan's lithium ion battery industry by developing technology and applications through Open Innovation
