

Target : NihonInter Electronics Corporation

Outline : Power devices manufacturer specializing in diodes

Authorized investment : ¥4 billion (maximum) (Final amount of ¥3.5 billion, reflecting market movements, etc.)

Investment
Managerial support

Nihon Inter Electronics Corporation

■ Power device manufacturer specializing in diodes

- Create a global company that can compete on equal terms with domestic and overseas power semiconductor makers in terms of product lineup, manufacturing scale and cost competitiveness
- Strengthen management in growth markets, growing market share and expanding business in greater China
 - Participate in new product areas (next-generation semiconductors)

Develop global markets, pursuing joint development, M&A and other forms of open innovation.
