Investment Management support in partnership development, etc.

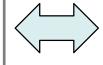

- Aim to launch a new product category in the power wheelchair sphere that integrates design and innovative functionality
- The use of omni-wheels (special tires that can move forward and backward as well as sideways) gives WHILL products excellent driving stability and maneuverability. By connecting to users' smartphones, WHILL also offers customization and navigation functions, providing the elderly and those with disabilities a smarter and more comfortable means of mobility
- Aim to acquire FDA* approval while building a manufacturing system and a sales and maintenance system in Japan and the U.S.
- * U.S. Food and Drug Administration. FDA approval is necessary in order to sell medical equipment in the United States.
